SKILLS

- **Frontend**: JavaScript (ES5, ES6+), React, Next.js, Tailwind CSS, Bootstrap, Sass, GSAP

- **Backend**: Node.js, Express, MongoDB, REST API Development, SQL

- **Tools and Technologies**: Git, GitHub, Figma, Canva, Docker

- **Cloud and Deployment**: Cloudflare, Netlify, Vercel, Hostinger

EXPERIENCE

- **American Nexus Trading Inc.** — Remote
  Software Developer Intern — Feb 2025 - Apr 2025
  - **Data Management and SQL Operations**: Filtered and processed large datasets for staffing and recruitment tasks using SQL query statements on Turso platform web dashboard, improving data retrieval efficiency for recruitment workflows.
  - **AI Content Creation**: Created AI-powered explanation videos showcasing different service offerings to expand AI agent capabilities for potential clients, resulting in enhanced marketing materials.
  - **Podcast Production**: Developed and published engaging AI-based podcasts for various service offerings using Spotify Creators platform, increasing brand visibility and client engagement.
  - **Gen AI Platform Research**: Curated and evaluated multiple Gen AI platforms covering diverse use-cases for internal team adoption, boosting productivity and work performance across departments.

PROJECTS

- **Fiber Jobs - React Job Board Application**: Designed and developed a fully responsive job board application using React 19 and Tailwind CSS with complete CRUD functionality for managing job listings. Implemented React Router for seamless navigation and JSON Server for mock backend REST API. Deployed live using industry-grade platform. Tech Stack: React 19, Tailwind CSS, React Router, JSON Server.

- **Iulia Istrati - Therapy and Counseling Platform**: Built a digital profile platform showcasing programs and services for Romanian mental health expert. Features include appointment booking system, adaptive responsive design, and intuitive UX. Delivered complete solution meeting all client requirements. Tech Stack: Bootstrap 5, Sass, JavaScript.

- **Quant - Node.js REST API for Inventory Management**: Built a native Node.js REST API without external frameworks to handle CRUD operations for product inventory. Implemented custom URL parsing and dynamic routing for GET, POST, and PUT requests. Designed file-based persistence layer using fs module to ensure data integrity. Deployed using Docker containers on GPU-powered infrastructure.

- **Cafe de Fuego - Ecommerce Landing Page**: Developed an e-commerce landing page promoting premium coffee product "The Maestro Blend" with focus on high-intensity roast and Brazilian beans. Implemented marketing strategy with limited-time offers, clear CTAs, and comprehensive product information display including aroma, flavor profile, and acidity details.

CERTIFICATIONS

- **Working with Version Control - University of Leeds**: Coursera certification covering Git, GitHub, version control systems, collaborative software development, issue tracking, and technical documentation. Verification: XL6SP1FQPQCG

- **APIs in Node.js: Write a RESTful API Backend Application**: Coursera certification in RESTful API development, Node.js, backend web development, and application programming interfaces. Verification: S1IDG9QILLI1

- **Gemini Certified Student - Google**: Google certification in Generative AI, Gemini platform, and advanced prompting techniques for AI applications.

EDUCATION

- **Chhatrapati Shivaji Maharaj University** — Maharashtra, India
  Bachelor of Science in Computer Science — July 2020 – May 2023
